

## **System Requirements for Encompass Standard and Professional Editions, Version 3.0 and Later**

**Note:** The third-party applications listed below are included on the installation CD and are installed during the Encompass installation if the applications are not already on your computer.

### **Server**

#### **Computer**

- 3 GHz CPU

#### **Operating System**

- Windows 2000 with Service Pack 4 (SP4)
- Windows XP with SP2
- Windows 2003 Server
- Windows Vista

#### **RAM**

- 1 GB (2 GB recommended)

#### **Hard Drive Space**

- 1.5 GB of free space to accommodate Encompass and third-party applications
- Additional hard drive space for data

#### **Network Port**

- 100 Mbps

#### **Third-Party Applications**

- Microsoft SQL Server 2000 or 2005 Express

### **Client**

#### **Computer**

- 2 GHz CPU

#### **Windows Operating System**

- Windows 2000 with SP 4
- Windows XP with SP2
- Windows 2003 Server
- Windows Vista

#### **Monitor Resolution**

- 800 x 600 or greater

**RAM**

- 512 MB minimum (1 GB recommended) if running Windows 2000, XP, or 2003 Server
- 1 GB minimum if running Windows Vista

**Hard Drive Space**

- 700 MB of free space for Encompass and third-party applications

**Third-Party Applications**

- Microsoft Internet Explorer 6.0 or later
- Microsoft .NET Framework 2.0
- Microsoft Visual J# 2.0
- Microsoft Office 2000 or later

**Internet Connection**

- A broadband connection such as cable or DSL with a 1-Mbps or faster download speed is required when the client accesses the server across the Internet (i.e. HTTPS).
- In all other cases, a high-speed Internet connection is highly recommended.
